

## 8510 - WELLNESS

As required by law, the Board of Education establishes the following wellness policy for the Almont School District.

The Board recognizes that good nutrition and regular physical activity affect the health and well-being of the District's students. Furthermore, research concludes that there is a positive correlation between a student's health and well-being and his/her ability to learn. Moreover, schools can play an important role in the developmental process by which students establish their health and nutrition habits by providing nutritious meals and snacks through the schools' meal programs, by supporting the development of good eating habits, and by promoting increased physical activity both in and out of school.

The Board, however, believes this effort to support the students' development of healthy behaviors and habits with regard to eating and exercise cannot be accomplished by the schools alone. It will be necessary for not only the staff, but also parents and the public at large to be involved in a community-wide effort to promote, support, and model such healthy behaviors and habits.

The Board sets the following goals in an effort to enable students to establish good health and nutrition habits:

- A. With regard to nutrition education, the District shall:
  1. Nutrition education shall be included in the Health curriculum so that instruction is sequential and standards-based and provides students with the knowledge, attitudes, and skills necessary to lead healthy lives.
  2. Nutrition education shall extend beyond the classroom by engaging and involving the school's food service staff.
  3. Nutrition education posters, such as the Food Pyramid Guide, will be displayed in the cafeteria.
  4. The school cafeteria shall serve as a learning lab by allowing students to apply the knowledge, attitudes, and skills taught in the classroom when making choices at mealtime.
  5. Nutrition education shall reinforce lifelong balance by emphasizing the link between caloric intake (eating) and exercise in ways that are age-appropriate.
  6. Nutrition education standards and benchmarks promote the benefits of a balanced diet that includes fruits, vegetables,

whole grain products, and low-fat and fat-free dairy products.

B. With regard to physical activity, the District shall:

1. **Physical Education**

- a. The physical education curriculum shall provide sequential instruction related to the knowledge, attitudes, and skills necessary to participate in lifelong, health-enhancing physical activity.
- b. Physical education classes shall provide students with opportunities to learn, practice, and be assessed on developmentally appropriate knowledge, attitudes and skills necessary to engage in lifelong, health-enhancing physical activity.
- c. Properly certificated, highly qualified teachers shall provide all instruction in physical education.
- d. Planned instruction in physical education shall teach cooperation, fair play, and responsible participation.
- e. Planned instruction in physical education shall meet the needs of all students, including those who are not athletically gifted.
- f. Planned instruction in physical education shall include cooperative as well as competitive games.
- g. Planned instruction in physical education shall promote participation in physical activity outside the regular school day.

2. **Physical Activity**

Physical activity should not be employed as a form of discipline or punishment.

C. With regard to other school-based activities the District shall:

1. The school shall provide attractive, clean environments in which the students eat.
2. Students, parents, and other community members shall have access to, and be encouraged to use, the school's outdoor physical activity facilities outside the normal school day.
3. Schools in our system utilize electronic identification and payment systems, therefore, eliminating any stigma or identification of students eligible to receive free and/or reduced meals.

D. With regard to nutrition promotion, the District shall:

1. encourage students to increase their consumption of healthful foods during the school day;
2. create an environment that reinforces the development of healthy eating habits, including offering the following healthy foods that comply with the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards:
  - a. a variety of fresh produce to include those prepared without added fats, sugars, refined sugars, and sodium
  - b. a variety of vegetables daily to include specific subgroups as defined by dark green, red/orange, legumes, and starchy
  - c. whole grain products - half of all grains need to be whole grain-rich upon initial implementation and all grains must be whole grain-rich within two (2) years of implementation
  - d. fluid milk that is fat-free (unflavored and flavored) and low-fat (unflavored)
  - e. meals designed to meet specific calorie ranges for age/grade groups

3. eliminate trans-fat from school meals
  4. require students to select a fruit or vegetable as part of a complete reimbursable meal
- E. The District nutrition department will promote and encourage Farm to School efforts in order to provide the healthy foods identified above.

Furthermore, with the objectives of enhancing student health and well being, and reducing childhood obesity, the following guidelines are established:

- A. In accordance with Policy [8500](#), entitled Food Service, the food service program shall comply with Federal and State regulations pertaining to the selection, preparation, consumption, and disposal of food and beverages, including but not limited to the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, as well as to the fiscal management of the program.
- B. As set forth in Policy [8531](#), entitled Free and Reduced Price Meals, the guidelines for reimbursable school meals are not less restrictive than the guidelines issued by the U.S. Department of Agriculture (USDA).

The sale of foods of minimal nutritional value in the food service area during the lunch period is prohibited.

- C. The sale of foods and beverages to students that do not meet the USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards to be consumed on the school campus during the school day is prohibited.
- D. All food items and beverages available for sale to students for consumption on the school campus (any area of property under the jurisdiction of the school that is accessible to students during the school day) between midnight and thirty (30) minutes after the close of the regular school day shall comply with the current USDA Dietary Guidelines for Americans and the USDA Smart Snacks in School nutrition standards, including, but not limited to, competitive foods that are available to students a la carte or as entrees in the dining area (except entree items that were offered on the National School Lunch Program (NSLP) or School Breakfast Program (SBP) menu on the day of and the day after they are offered on the NSLP or SBP menu), as well as food items and beverages from vending machines, from school stores,

or as fund-raisers, including those operated by student clubs and organizations, parent groups, or boosters clubs.

- E. The food service program will provide all students affordable access to the varied and nutritious foods they need to be healthy and to learn well.
- F. The school food service program may involve students, parents, staff, and/or school officials in the selection of competitive food items to be sold in the schools.
- G. The food service program shall be administered by a qualified nutrition professional.
- H. The food service program shall be administered by a director who is properly qualified, certificated, licensed, or credentialed, according to current professional standards.
- I. All food service personnel shall receive pre-service training in food service operations.
- J. Continuing professional development shall be provided for all staff of the food service program.

The Board designates the Superintendent as the individual(s) charged with operational responsibility for verifying that the District meets the goals established in this policy.

The Superintendent shall appoint a District wellness committee that includes parents, students, representatives of the school food authority, educational staff (including physical education teachers), school health professionals, members of the public and school administrators to oversee development, implementation, evaluation and periodic update of the wellness policy. The Wellness Committee shall be an ad hoc committee with members recruited and chosen annually.

The Wellness Committee shall be responsible for:

- A. assessment of the current school environment;
- B. review of the District's wellness policy;
- C. presentation of the wellness policy to the school board for approval;
- D. measurement of the implementation of the policy;

E. recommendation for the revision of the policy, as necessary.

Before the end of each school year the Wellness Committee shall recommend to the Superintendent any revisions to the policy it deems necessary.

The Superintendent shall report annually to the Board on the progress of the Wellness Committee and on its evaluation of policy implementation and areas for improvement, including status of compliance by individual schools and progress made in attaining goals of policy.

The Superintendent is also responsible for informing the public, including parents, students and community members, on the content and implementation of this policy. In order to inform the public, the Superintendent shall include information in the student handbook; and post the policy on the District's website, including the Wellness Committee's assessment of the implementation of the policy.
